

Maldives backup power storage system

Overview

The Maldivian government has signed a landmark agreement to deploy 38 megawatt-hours (MWh) of battery energy storage systems (BESS) alongside energy management systems (EMS) across 18 residential islands, as part of its transition to renewable energy. The project was awarded to a joint venture between China National Technical Import and Export Corporation. For the Maldives' 1,192 coral islands, reliable emergency power storage isn't just useful; it's critical infrastructure. Imagine living on a paradise island where power outages could mean more than just inconvenience - they might endanger tourism revenue and medical services.

Maldives backup power storage system

maldives backup energy storage battery

The Republic of Maldives has reopened a tender process, seeking to procure 40MWh of battery energy storage systems (BESS) in an energy transition project supported by World Bank funding.
