An initial feasibility assessment by a qualified team will uncover the benefits and challenges you can expect for system operation. This stage also helps you determine who pays for the system. ; microgrids supporting local loads, to providing grid services and participating in markets. This white paper focuses on tools that support. The APEX Microgrid Control System (MCS) is designed to manage all available power sources in a microgrid according to the site requirements including operational requirements, utility requirements, grid and other conditions.
