

# Mn solar container energy storage system

## Overview

---

A solar plus-battery storage project in Ramsey, Minn., owned by Connexus Energy, began operating in 2018. The system allows Connexus to collect and save power generated by the solar panels to use at times when electricity demand and prices are high. One of the projects will. The Minnesota Public Utilities Commission (PUC) has approved two large renewable energy projects - the Iron Pine Solar Project and the Northern Crescent Solar Project - that together add more than 475 megawatts (MW) of solar energy capacity to the state's grid. Our work in the 2019 Legislative Session helped lay the foundation for a Minnesota storage industry and our efforts in 2023 created the first energy storage incentives in the state. Cloud in Minden Township, Minnesota. Commissioner John Tuma noted that the facility aims to.

## Mn solar container energy storage system

### Energy Storage Incentives

The battery storage system is new and installation occurs on or after Aug. The incentive will not be eligible for existing energy storage systems that are already in operation before Aug.
