

Mobile Energy Storage Container 5MWh Discount

Overview

Higher Energy Density With a total capacity of 5.015MWh in a single 20-foot container, the system sets a high benchmark for liquid-cooled energy storage. The compact footprint reduces land use and lowers upfront infrastructure costs. The best choice depends on your application—whether for renewable integration, peak shaving, or backup power. Featuring liquid-cooled 314Ah cells, it offers scalable capacity, intelligent thermal management, and advanced fire protection within a compact IP55-rated. uses standard battery modules, PCS modules, BMS, EMS and other systems to form standard containers to build large-scale grid-side energy storage projects. It is designed to meet the needs of large-scale energy storage and is widely used in energy storage, power grid peak. The 5MWh Liquid-Cooled containerized energy storage system operates at a rated voltage of 1460V, utilizing LFP battery technology with a capacity of 5000kWh. 9 meters with a total weight of 56 tons, supports ambient temperatures from -20°C to 55°C, and comes equipped.

Mobile Energy Storage Container 5MWh Discount

5MWh Energy Storage Container System

Adopting high-capacity and high-performance battery packs, it can achieve 5MWh of energy storage to meet the demand for long-time and large-scale energy storage.
