

# Mobile base station equipment power generation

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load of the base station computer room, and the insufficient power is. Mobile substations are a perfect solution, whenever utilities and industries need to provide interim grid connections and temporary power supplies. Applications range from power supply during emergency or planned outages, to events, moving loads, and the integration of distributed or renewable. Our fully integrated mobile energy solution, engineered for uninterrupted, off-grid power. A cutting-edge mobile energy platform combining solar power, shore-power, and generator-based backup in one self-contained unit. Besides standard configuration, Siemens Energy can also include most environmentally. Built along the lines of a Micro-Grid Energy System (MGES), it comprises four elements - power generation, control, monitoring, and energy storage.
