

# Morocco s new energy storage power source

## Overview

---

To address this, Morocco is resolutely focusing on lithium iron phosphate (LFP) batteries, a reliable, durable technology suited to local constraints. This choice is part of a national strategy for equipping, testing, and industrializing energy storage. The Office National de l'Électricité et de l'Eau potable launches a large-scale storage programme to absorb production fluctuations from renewable sources. This article explores how the country's strategic investments in battery storage, pumped hydro, and hybrid systems are reshaping its energy landscape while. The National Office of Electricity and Drinking Water (ONEE) has recognized the importance of implementing battery energy storage systems (BESS) and pumped-storage hydroelectric plants (STEPS) to address the intermittency of renewable energy production and stabilize Morocco's national power grid. According. A sun-drenched North African nation, blessed with 3,000+ hours of annual sunshine, now racing to become the continent's battery hub.

## Morocco s new energy storage power source

---

### Morocco plans first standalone energy storage facility

The north-west African country plans to build a 1,600 MW battery energy storage system to support its expanding renewable energy sector. The national power utility company is set to invite bids for the ...
