

Multi-power high frequency solar inverter

Overview

Updated in mid-2023 to a dual tracker design, its high-frequency technology delivers exceptional efficiency in a quiet, lightweight package with low standby power. 2KW, this multi-function inverter combines a powerful MPPT solar controller, pure sine wave inverter, and UPS function in one. The Multi RS Solar 48/6000 is a 48V 6kVA inverter/charger with two independent 3kWp PV 450V MPPT trackers for 6kWp total panel capacity. It supports direct grid connection without batteries—perfect for starting simple and adding storage later. These expansive solar installations, often spanning several megawatts to hundreds of megawatts in capacity, are designed to feed large amounts of electricity by the electrical grid. During the daytime solar power can run. All-in-One Integration Simplifies Installation: Modern inverter-chargers with integrated MPPT solar controllers, battery management, and monitoring capabilities reduce component count, simplify wiring, and improve system coordination compared to separate components. It features robust start-up power and guarantees an exceptionally stable power supply, ensuring unrivaled performance and maximizing the energy potential of your power system. Smart control mode, auto switch.

Multi-power high frequency solar inverter

Battery String-S224

- 1C Charge/Discharge
- Easy configuration and maintenance
- Power supply can be single battery string or parallel battery strings

HITACHI SOLAR INVERTERS FOR

This application note will explore the technical specifications, benefits, and deployment considerations of solar string inverters in multi-megawatt and utility-scale PV power plants, highlighting their ...
