

Myanmar Industrial and Commercial solar container energy storage system Production

Overview

Major commercial projects now deploy clusters of 15+ systems creating storage networks with 80+MWh capacity at costs below \$270/kWh for large-scale industrial applications. Technological advancements are dramatically improving industrial energy storage performance. To address these challenges, the industrial park deployed the Dyness STACK100 commercial and industrial energy storage system, configured with 60 kW storage capacity paired with four 50 kW inverters. The solution was designed to address unstable grid power, high electricity costs, and strict delivery requirements under a government. Home backup, solar system backup, small enterprises, base stations and other uninterruptible power supply backup system Our energy storage system is a customerized solution integrating battery packs, BMS, PCS, EMS, auto transfer switch, etc. It offers energy ranging from 75kWh to 1MWh and covers. As Myanmar's manufacturing hub accelerates development, Mandalay industries face growing energy demands.

Myanmar Industrial and Commercial solar container energy storage

Test certification
CE FC

Woteam Group Myanmar

It offers energy ranging from 75kWh to 1MWh and covers most of the commercial and industrial application scenarios, such as load shifting, renewable clipping, and back-up power, etc.
