

NDRC New Energy Storage

Overview

The “Special Action Plan for Large-Scale Construction of New Energy Storage (2025-2027)” released by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) outlines a roadmap to scale up energy storage to support the country's rapidly. The “Special Action Plan for Large-Scale Construction of New Energy Storage (2025-2027)” released by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) outlines a roadmap to scale up energy storage to support the country's rapidly. On Janu, National Development and Reform Commission (NDRC) and National Energy Administration (NEA) jointly issued Notice on Improving Generation-side Capacity Pricing Mechanism. Establishment of a capacity pricing mechanism for grid-side independent new-type energy storage. Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and establishing a new power system. The country has vowed to realize the full. Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion (\$35. 1 billion) in sector investment.

NDRC New Energy Storage

NDRC and the National Energy Administration of China Issued the New

By 2030, new energy storage technologies will develop in a market-oriented way. On March 21, the National Development and Reform Commission (NDRC) and the National Energy ...
