

Namibia bans lithium batteries for energy storage capacitors

Overview

The government of Namibia said on Thursday that it has barred the export of unprocessed lithium and other vital minerals in an effort to capitalize on the rising demand for metals used in renewable energy technology worldwide. But why should the world care about this project in a nation of 2.5 million people?

Wait, no – it's not just about keeping lights on.

Namibia bans lithium batteries for energy storage capacitors

Namibia bans lithium and other key mineral raw ore exports

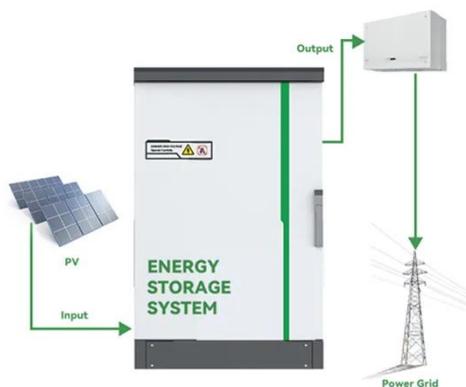

Lithium is crucial for renewable energy storage, and the southern African country is rich in lithium resources, as well as rare earth minerals, such as dysprosium and terbium, used in the ...
