

## Overview

---

Strictly follow the national standards such as NB/T 10115 for the design of photovoltaic support structure, GB 50009 for the load of building structure, and JGJ 257 for the technical specification for cable structure, long-term operation, safety and stability. All standards play an important role in the Photovoltaic industry. Since PV is such a global industry it is critical that PV products be measured and qualified the same way everywhere in the world. IEC TC82 has developed and published a number of module and component measurement.

## National Standard Specification for Photovoltaic Flexible Bracket

---

### Requirements and standards for photovoltaic brackets

New standards under development include qualification of junction boxes, connectors, PV cables, and module integrated electronics as well as for testing the packaging used during transport of
