

# New Zealand Power Storage Cabinet

## Overview

---

This electric storage cabinet keeps temperature steady between 54–72°F and maintains ideal humidity levels for long-term preservation. Keep insulated tools, PPE, and test instruments within a safe operating envelope.

Environmental simulation testing in climate chambers provides an indication of how test specimens will behave under. Constant climate chambers, KBF / KMF series For long-term stable temperature/humidity simulations in one chamber. The constant climate chambers are ideal for norm-compliant work according to ICH guidelines and work independently of the water supply. The humidity range is controlled by means of a capacitive humidity sensor and responsive. With advanced constant - temperature technology, it precisely controls the internal environment temperature, just like customizing a “constant - temperature room” for collections.

## New Zealand Power Storage Cabinet
