

# New liquid flow battery energy storage

## Overview

---

Researchers in Australia have created a new kind of water-based “flow battery” that could transform how households store rooftop solar energy. The system could outperform expensive lithium-ion options. Engineers. Next-level energy storage systems are beginning to supplement the familiar lithium-ion battery arrays, providing more space to store wind and solar energy for longer periods of time, and consequently making less room for fossil energy in the nation's power generation profile. In the 1970s, scientists at the National Aeronautics and Space Administration (NASA) developed the first iron flow.

## DETAILS AND PACKAGING

- 1 USER MANUAL PDF
- 2 RJ45 Cable For RS485/CAN
- 3 Battery in Parallel Cables
- 4 RJ45 TO USB Monitor Cable
- 5 M8 Terminal\*4

## New all-liquid iron flow battery for grid energy storage

A new iron-based aqueous flow battery shows promise for grid energy storage applications.
