

New solar system models in Portugal

Overview

We have a dream: to build the first model of the solar system in three dimensions and to scale in Spain. Where?

In the region of Ciudad Rodrigo. The route with 10 symbols starts at the very beginning of the pedestrian bridge with the Sun represented. The purpose of scale models of our solar system is to help give us humans living on this third rock from the sun a better idea of the sizes of the various celestial bodies that surround us, and the enormous distances they travel through in their orbits. The enormous ratio. Sunshining, a company that belongs to Spanish-Portuguese solar developer Prosolia, plans to use Tesla batteries to support its proposed 1GW solar system in Alentejo, Santiago do Cacém. The plant would require an estimated €1 billion investment. The Câmara Municipal de Santiago do Cacém's urban.
