

# No electricity charges for solar power generation

## Overview

---

Your electric bill will indicate both the energy consumed from the grid and any surplus energy generated by your renewable setup, leading to the question: do you have to pay for electricity if you have solar panels?

. Your electric bill will indicate both the energy consumed from the grid and any surplus energy generated by your renewable setup, leading to the question: do you have to pay for electricity if you have solar panels?

. Even with this sustainable solution, you may still find yourself paying for electricity, as remaining connected to the grid means you could incur charges if your energy consumption surpasses your solar generation. While it's comforting to know that net metering can help offset some costs by. For customers considering solar and other renewable generation<sup>1</sup> at their homes, the Solar Billing Plan is designed to help modernize solar rates to promote grid reliability, incentivize solar and battery storage, and help control electricity costs for all Californians. Each month, billing will. Battery storage can extend the use of renewable energy to peak evening hours, helping to decrease the need to generate electricity from fossil fuels. This reduces overall grid costs, which improves energy affordability for all Californians. Learn more about the CPUC decision.
