

# Off-grid mobile energy storage container for ports

**215kWh**

8,000+ Cycles Lifetime

IP54 Protection Degree

## Overview

---

An Off Grid Container is a modular, transportable unit designed to operate independently from public utilities. It typically includes integrated solar panels, battery storage systems, inverters, and sometimes backup diesel generators. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. Enerbond's battery energy storage solution provides a complete, scalable, and mobile approach to managing power across industrial, commercial, and off-grid applications. As you witness the gentle humming of these compact powerhouses, it becomes clear that innovation isn't always about creating the new but also. Boxhub is the leading provider of new and used shipping containers for solar panel installations and battery storage. These range from solar self-consumption and demand charge reduction to peak shaving.
