Outdoor solar power hub made in bolivia

Overview

The new solar photovoltaic plant, with an installed capacity of 120 MW, the largest of this technology in the country, will be built in the municipality of Tupiza, Sud Chichas province in the department of Potosí, on an area of 110 hectares in the rural community of Hornillos. This reality has prompted the Bolivian government and its partners to embrace a more practical solution: decentralized solar power. This article makes the business case for establishing a solar module factory in Bolivia to supply this growing and predictable domestic market. The Board of Directors of CAF, Development Bank of Latin America and the Caribbean, approved. Bolivia's Santa Cruz region has become a focal point for solar energy development. With over 2,000 hours of annual sunlight and government incentives, the area offers ideal conditions for photovoltaic (PV) module production. Solar resource map copyright at 2021 Solargis.
