

PV inverter volume

Overview

The global PV inverters market is projected to grow from USD 18.24 billion by 2024, expanding at a CAGR of 17.2% during the forecast period (2025-2033). Growth is driven by the global shift toward renewable energy, residential solar demand, and strong policy support in Asia Pacific. PV inverters are critical components in solar energy systems that convert the direct current (DC) generated by photovoltaic (PV) panels into alternating current (AC). The PV inverter industry is valued at USD 1.2 billion.
