

# PVC pipe to make vertical wind turbine blades

- ✓ **ALL IN ONE**
- ✓ **100Kw/174Kwh  
High Capacity**
- ✓ **Intelligent  
Integration**

## Overview

---

This tutorial teaches how to make homemade PVC wind turbine blades using a 10 cm diameter PVC pipe. PVC Lightweight and cost-effective, perfect for DIY energy. This is a vertical wind turbine which can rotate at a high speed even when the air flow is normal. Lastly, its flexibility allows for easier shaping and customization. Lightweight: Enhances the efficiency of the turbine. The very centre of the blade will probably need to be removed to avoid the axle or hub.
