

# Panama manufacturing energy storage

## Overview

---

Panama's strategic location and commitment to sustainable energy solutions are transforming it into a hub for supercapacitor production. With growing global demand for fast-charging energy storage systems, this Central American nation offers unique advantages that manufacturers can't. Panama has launched a 500MW tender auction for renewables and energy storage, the first in Central America to include storage. We pioneered the technology over one decade ago, and today almost half our new projects include a storage component. This \$300 million initiative isn't just about keeping. ization of world energy systems. It significantly benefits addressing ancillary power services, power quality stability, and power supply reliability. 5-megawatt Cape San Blas.
