

# Panama renovates solar power station

## Overview

---

Panama formally inaugurated the Santiago Solar Park, a \$70 million investment by the Naiad Renovables Group with a capacity to produce 86,333 megawatts peak (MWP), providing a new boost to renewable energy in this country, where the photovoltaic and wind energy segments accounted.

Panama formally inaugurated the Santiago Solar Park, a \$70 million investment by the Naiad Renovables Group with a capacity to produce 86,333 megawatts peak (MWP), providing a new boost to renewable energy in this country, where the photovoltaic and wind energy segments accounted. The Electric Generation Company (EGESA) has received approval from its Board of Directors for the construction of a new 5 Megawatt (MW) solar plant, a key step in the progress towards a more sustainable energy model for Panama. The new solar plant aims to significantly increase the renewable energy.

Panama has unveiled its largest solar power facility to date: the \$70 million El Espino solar park. It will be equipped with a total of around 70,000 solar panels. Panama will relaunch national energy planning in 2026 with the National Energy Plan 2025–2050, introducing competitive renewable energy auctions as part of a long-term power sector roadmap through 2050. These projects together contribute more than 60 MWdc of clean energy to the national grid, significantly.
