

Paraguay adds new energy storage batteries

Overview

As South America races toward its 2030 renewable energy targets, Paraguay's Cerro Port Energy Storage Export initiative emerges as a game-changer. Last month, a pilot project in Ciudad del Este demonstrated how lithium-ion batteries could smooth out daily demand spikes. The 5MW system stored excess afternoon solar power (from newly installed PV panels) to cover evening peak loads. But wait - why. The country has not announced any grid-scale energy storage projects to-date. This article explores the city's operational and planned storage facilities, their impact on Paraguay's energy grid, and how companies like EK SOLAR contribute to this gr As. In Paraguay's "Power Generation Master Plan 2021-2040," seven projects will deploy solar power facilities with battery storage systems. Paraguay's energy grid, which traditionally depends heavily on hydroelectric power, is poised to benefit.
