

Philippines replaces solar sites with environmentally friendly electricity

Overview

Philippine telecommunications giant Globe is set to transition over 3,000 of its cell sites and other low-energy facilities in Metro Manila and the CALABARZON region to 100% renewable energy by 2028. Across the Philippines, solar is reshaping daily life. Local projects and financing programs are making it more accessible, supporting national targets of 35% clean energy by 2030 and 50% by 2040. MANILA, Philippines — The Philippines has some of the highest electricity rates in Southeast Asia. Singapore, J- Increasing the role of renewables in the generation mix could reduce the Philippines' reliance on imported fuels and boost its energy security, according to BloombergNEF's latest report, *The Philippines' Path to Clean and Affordable Electricity*. One cost line is sinking—the price of. Solar is the most affordable new source of electricity 3. Retrofitting thermal power plants for hydrogen and ammonia 3.
