

Photovoltaic bracket down-the-hole drilling method

Overview

Step 1: Level the assembled mounting bracket by using a level, and mark the positions for drilling holes on the wall. The shape of the bottom of the hole is determined by the tool used to create. Imagine trying to assemble a giant Lego set with a butter knife - that's what using traditional drilling methods for photovoltaic brackets feels like. Enter electric drilling for photovoltaic bracket installations, the power tool equivalent of a lightsaber in the solar industry.
