

# Photovoltaic energy storageims

## Overview

---

By integrating energy storage solutions, such as batteries, with PV systems, it becomes possible to store excess energy generated during peak sunlight hours for utilization during periods of low generation or high demand. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. The reason: Solar energy is not always produced at the time. Technologies (solar+storage). Delivering the Power Behind New Growth Demand for electricity is accelerating as data centers grow and U.
