

# Photovoltaic new energy storage market

## Overview

---

The market is expected to reach USD 378.5 billion in 2034, at a CAGR of 17.05% during the forecast period (2026-2031). Government incentives for solar-plus-storage installations and net metering policies enhancing storage demand along with rising environmental concerns will augment the business landscape. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects. Cost breakthroughs in lithium-iron-phosphate batteries, long-duration storage mandates in China, and the growing demand for efficient and competitive energy resources is likely to propel market growth over the coming years. "Standalone solar is not dead, but it is challenging," said Pierre Bartholin, head of power hedging at investor Nuveen Infrastructure, opening the debate at.
