

# Photovoltaic panel controller connected to battery

## Overview

---

If you're using solar panels with battery storage, a solar charge controller is essential. But what does a battery fear?

From what does a controller actually. Connection sequence is critical for equipment safety - Always connect batteries to charge controllers before solar panels. This basic guide explains what it does and why it's important to a solar energy system. What does a charge controller do?

A solar charge controller manages the power going in and out of the batteries in a solar. Connecting solar panels to a battery system is essential for storing energy generated from the sun. Without it, your battery could suffer from.

- LiFePO<sub>4</sub> Battery, safety
- Wide temperature: -20~55°C
- Modular design, easy to expand
- The heating function is optional
- Intelligent BMS
- Cycle Life: > 6000
- Warranty: 10 years

## Solar Panel Charge Controller Wiring Diagram & Steps

Before connecting the battery to the solar system, make sure the battery voltage is higher than 6V, then start the controller. If the system is 24V, make sure the battery voltage is not lower ...
