

Photovoltaic panel installation with M-shaped water tank

Overview

In order to achieve the above object, the technical solution of the present invention is: a photovoltaic support with an M-shaped water tank comprises a water tank and a locking piece, wherein the water tank comprises a main tank, a left support leg and. In order to achieve the above object, the technical solution of the present invention is: a photovoltaic support with an M-shaped water tank comprises a water tank and a locking piece, wherein the water tank comprises a main tank, a left support leg and. M-type water tank photovoltaic panel installati he designer must match the individual components together. In order to connect your collectors to the heat exchanger and storage tanks, your.
