

Photovoltaic panel sealing strip production equipment

Overview

The Double-Glass Sealing machine is used for the automatic tape edge banding/sealing process of the double-glass module before lamination. Our company is located in Qinghe, Xingtai, Hebei, China. Our company covers an area of 4,000 square meters, with a modern seal production line, hard enclosed mixing machines and 68 sets of curing equipment. At present, it has an internal mixing center, an. These high-performance sealing strips are specially designed for various solar panels, offering excellent waterproofing, weather resistance, and aging durability. They effectively prevent moisture and dust ingress, protect internal components, and enhance panel lifespan and energy efficiency. Silicone rubber extrusion seal has excellent chemical and physical property, high and low temperature resistant, wearing resistant, oil resistant, dust resistant etc. It also can be used in. SEMIPHOTON, INC.

Photovoltaic panel sealing strip production equipment

EPDM Rubber Gasket Waterproof T Shape Solar Photovoltaic Panels Sealing

Our company covers an area of 4,000 square meters, with a modern seal production line, hard enclosed mixing machines and 68 sets of curing equipment. The designed production capacity is 10 million ...
