

Photovoltaic panel sun room lower pressure block combination

Photovoltaic panel sun room lower pressure block combination

Installation, use, maintenance manual

Thanks to a vertically integrated design of the photovoltaic and thermal components in a single panel (protected by 3 families of patents), the SPRING panel is specifically designed for optimized ...

Installation, use, maintenance manual

1.1. General safety instructions
 1.2. General standards to be observed
 2. Definition of a pressurized solar thermal system
 A. See Installation, use, maintenance manual DualSun SPRING downloadable from DualSun online library
 2.1. Operating principle of a pressurized solar thermal system
 2.2.2. DualSun SLL solar station
 o Hot water storage tank
 Tank with fresh water exchanger
 3.1. Installation of the DualSun SPRING hybrid panel
 Sizing:
 3.2.2. Presentation of a ISWH pool discharge installation
 Positions of the ball valves:
 3.3.5. In which case is it necessary to control the back-up so as not to hamper the operation of the solar installation?
 Case 1:
 Case 2:
 Case 3:
 3.3.5.3. Control by DualSun SLL solar controller of a thermodynamic tank with dry contact
 Procedure for modifying the system parameter:
 Fastening
 4.2. Choice

of heat transfer fluid5.1. Rinsing of the ISWH solar and pool discharge circuits5.3. Filling of the swimming pool discharge solar circuitReminder of names:1.7 L / min = 0.1 m³/ h6. Guarantees6.1. Commissioning report7. General recommendationsSafety of workersAfter-sales service and maintenance conditionsPlease read this installation manual thoroughly and in detail in order to be able to fully exploit the functionality of the product. DualSun disclaims all liability for defetscs and damages that would result from non-compliance with the installation instructions (improper use, incorrect installation, handling error, etc.). IMPORTANT It is important See more on dualsun solar-system [PDF]

How to use the photovoltaic panel pressure plate

Firstly, each solar panel should be wrapped individually. The use of a cushioning material such as bubble wrap or foam can provide a protective layer against accidental knocks or bumps.
