

Photovoltaic panels are not well sealed during installation and leak

Overview

Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production. To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar. Installing solar panels can be a great way to harness renewable energy, but some homeowners worry about potential roof leaks after the installation. Almost always, homeowners will notice the leak within the first year, when it begins to rain or snow. Fortunately, these leaks are quite rare. However, improper solar panel installation can damage your roof, leading to costly repairs and premature roof replacement. In this post, we'll explore the main reasons behind potential leaks, how to prevent them, and what to do if you encounter this issue. **WHY DO ROOF LEAKS HAPPEN?**

Roof leaks.
