

Photovoltaic panels are rinsed with tap water

Overview

Yes, you can clean solar panels with tap water. It's also crucial to use a soft brush to avoid scratching them. Before delving into the specifics, let me introduce myself. However, the suitability of tap water for this purpose is not straightforward. System consists of 10 panles, 5 in upper row and 5 in lower row. What I did was I washed only. Here's where the million-dollar question arises — Can you clean solar panels with good old tap water?

Let's get into the center of this sparkling topic and clear the haze. Tap water often contains dissolved minerals and salts which leave behind streaks and deposits when they dry on the glass. These residues scatter sunlight and permanently reduce panel efficiency.
