

# Photovoltaic panels installed on the grid

## Overview

---

A grid-tied solar system, also known as a grid-connected or on-grid solar system, is a photovoltaic system that connects directly to the public electricity grid. This connection allows your solar panels to work in harmony with your utility company's power supply, creating a. Grid-tied solar dominates the market for good reason: With 2025 system costs ranging from \$2.00 per watt installed and federal tax credits of 30% through 2032, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive. Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. Department of Energy Solar Energy Technologies Office (SETO) have made solar energy more affordable for American. To connect solar panels to the grid, you need to install a bi-directional meter on your home.
