Overview

Thousands of panels on a solar farm southwest of Houston, Texas, were damaged by a powerful hailstorm on March 15. Aerial footage showed rows of cracked photovoltaic cells at the Fighting Jays Solar Farm near Needville in Fort Bend County, local news channel KTRK reported on Saturday. The truth is that solar panels are safe and a necessary power source as America works to meet ever increasing demand for electricity. The Solar Energy Industries Association (SEIA) has rejected the reports, which contained categorically false information. From pv magazine USA A hailstorm in Texas. A recent hailstorm in southeastern Texas led to significant damage to a large solar farm, which the project's developer says is operating at a lower capacity as a result. Yet, the irony is that energy infrastructure of any. TESTED. COM's Kishore Hari and Norm Chan visited Westpak's San Jose lab with their high-speed camera crew to record the effect of impacting a solar panel with simulated 25mm (1") diameter hail balls launched by Mr. Freeze, a specialized air gun used in solar module testing.
