

Photovoltaic solar roof container structure

Overview

Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Design support one rows of 12 modules in portrait when placed on a single width container structure. Designed for practicality, durability, and ease of use, this system turns ordinary shipping containers into self-sustaining. Laying solar panels on the roof of a container not only gives it new functions, but also transforms it into a small independent power generation unit.
