

# Placement angle of a single photovoltaic panel

## Overview

---

This angle, usually between 30 and 45 degrees, ensures your solar panels catch the most sunlight throughout the year. So, tilt your panels to the same angle as your latitude for optimal performance and savings. In this guide, we'll break down. Our solar panel angle calculator takes the guesswork out of panel positioning, suggesting panel tilt angles based on your location's latitude and your willingness to reposition based on the sun's seasonal dance across the sky. The calculator. The optimal tilt angle of photovoltaic solar panels is that the surface of the solar panel faces the Sun perpendicularly.
