

Polar night solar energy storage

Overview

The Finnish company was founded in 2018 and specialises in the design and manufacture of high-temperature thermal accumulators. Its main product is the sand battery that stores wind and solar energy, helping to reduce fuel use. Polar Night Energy's industrial-scale thermal energy storage powers the change from fossil fuels to renewable energy. Pornainen, in southern Finland, is now home to the world's largest sand battery: a 13-metre-high, 15-metre-wide. Polar Night Energy, a startup in Finland, has developed technology for warming up buildings with solar-generated heat stored in sand.

'A very Finnish thing': Big sand battery starts storing wind and solar

It's quite a simple structure to begin with, Polar Night Energy said of its prototype. A tall tower is filled with low-grade sand and charged up with the heat from excess solar and wind
