

Portable power solar station in Yemen

Overview

Funded by the United Arab Emirates and operational since July 2024, the 120-megawatt Aden Solar Power Plant supplies power to up to 170,000 homes daily, easing decades of fuel shortages and infrastructure collapse caused by war. Nearing completion in Yemen's Shabwa Governorate, the 20 MW Shabwa Solar Power Station is a landmark project from the UAE-based renewable energy company Masdar, with operations expected to begin in 2025. The Aden Solar Power Plant, a 120-megawatt facility funded by the United Arab Emirates, began. Recognizing this urgent need, UNDP, with support from the Kuwait Fund for Arab Economic Development, is implementing the "Renewable Energy to Improve Access to Health Services and Livelihood Opportunities" (HEAL) Project across five governorates in Yemen: Aden, Lahj, Abyan, Sana'a, and Hajjah. Yemen's first large-scale solar power plant is offering much-needed relief to Aden, a city long plagued by electricity shortages.
