

# Power supply for mobile micro base stations

## Overview

---

The 5G micro base station power supply is capable of converting, regulating, and managing the input power (such as AC or DC) to meet the strict requirements of voltage, current, and power for 5G micro base stations under different working conditions. Preparedness starts at home, find out more about how to stay ready, alert and aware. The Duracomm Power Supply delivers a simple solution for MicroMobile users to kickstart their base station by easily connecting the GMRS radios to a standard AC electrical plug, bringing powerful communication to. This 5G Micro Base Station Power Supply offers dependable lithium battery backup in a compact, high-efficiency format. Built with LiFePO<sub>4</sub> chemistry, it delivers long-lasting power for critical 5G infrastructure. These three systems are known as the environmental monitoring system, the data communication system, and the power supply system. With 5G requiring up to **\*\*3-4x** more base stations per square kilometer\*\* compared to 4G due to higher frequency bands and shorter signal. Power Supplies for Two-Way Radio Base Station installations.
