

Prefabricated foundation for solar photovoltaic panels

Prefabricated foundation for solar photovoltaic panels

Concrete foundation: a common support structure for solar energy systems

Suitable for flat roofs, low-slope roofs, or ground-mounted systems, precast foundations are simple and fast to construct, especially in wetland areas or landfills where drilling is difficult.

Solar Ballasts

Precast concrete ballast footing used to securely position solar panels and related mounting hardware and help prevent movement and overturning of solar panel systems.
