

# Price of a complete wind power generation system

## Overview

---

Residential wind turbines range widely in price, from \$500 for micro units to \$80,000 for full-size home systems, depending on size and installation needs. Commercial Projects Offer Best Economics: Utility-scale wind turbines at \$2.6-4 million each provide the most attractive financial returns with 5-10 year payback periods and capacity factors of 25-45%, significantly outperforming residential systems. Hidden Costs Are Substantial: The turbine itself. As one of the most promising and rapidly scaling sources of renewable energy worldwide, wind power offers tremendous potential to cost-effectively reduce carbon emissions and meet rising electricity demand. But harnessing the wind comes at a steep upfront investment. The current price of raw materials such as steel and copper has an effect on the initial cost, which can fluctuate over the course of a year. With a variety of options available, you'll. Horizontal axis wind turbines are the most common type of wind turbine on the market today.
