

Price of photovoltaic panels and material prices

Overview

To find the most up-to-date solar panel costs in 2025, we compared research from the U. This chart refers to the average cost range across all common solar system sizes. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. When people talk about the cost of going solar, they usually jump straight to installation quotes, financing options, and government incentives.
