

Price of solar grid-connected inverter in the United States

Overview

A solar inverter costs \$2,000 on average, with prices often ranging from \$1,000 to \$3,000. That said, some homeowners spend as little as \$800 or as much as \$5,000. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter makes up about 10% of the total cost of your solar energy system. 24 per watt on a solar inverter, not including labor costs. It's a critical decision point that directly impacts project bankability, long-term. As the demand for renewable energy surges, solar inverter prices in 2025 continue to evolve, influenced by technological advancements, increased manufacturing, and global energy policies. String inverter systems cost less up front, but systems using microinverters last.
