

# Price of solar panel Dae

## Overview

---

The average cost of a 12 kW solar panel installation on EnergySage is \$30,505 before available incentives. You'll typically save anywhere from \$37,000 to \$148,000 over 25 years by installing solar panels. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system. Our estimator shows how many solar panels your home needs. We generate an online cost and savings estimate. You choose how many solar companies send you an exact price by email or text. Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live. Solar panels cost about \$30,500 on average—but often pay for themselves several times over through 25-30 years of electricity savings.
