

# Public solar base station energy storage exemption

## Overview

---

The new law clarifies that leases and easements for the financing, erection, and sale of energy storage projects are, like leases and easements for qualifying wind and solar projects, not subject to the Map Act. Ensuring safety and compliance with relevant codes and standards, such as the International Fire Code, NFPA 1 Fire Code, NFPA 855, UL 9540, and UL 9540A, is crucial in the manufacturing, construction, installation, and operation of energy storage systems. Energy storage refers to a variety of. Before the Inflation Reduction Act (IRA) was enacted in 2022, BESS could only access federal tax credit funding when powered by solar and required the business-owned storage to be charged with solar 75 percent of the time. The IRA expanded the investment tax credit by eliminating the requirement. Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs. In support of the Biden-Harris Administration's goal to promote the development of clean energy and supporting infrastructure. On Novem, the Department of Energy (DOE) published a proposed rule that would expand categorical exclusions under the National Environmental Policy Act (NEPA) for power line repair projects and solar facilities on previously developed land, and would create a new categorical exclusion.
