

Renewable electricity rosso

50KW modular power converter

Flexible Configuration

- Modular Design, Expanding as Required
- Small&Light, Wall Mounted
- Installed in Parallel for Expansion

Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

Reliable Protection

- Outdoor IP65 Design
- Sufficient Protection Functions Equipped

Overview

Rosso harnesses energy sources, such as flared natural gas or surplus from clean and renewable energy productions, to sustain the computational resources essential for advancing collective progress while mitigating environment impacts. The primary reason for stranded energy in Argentina is the lack. A Texas-sized power bank that could charge every smartphone in North America simultaneously. While the newly operational Rosso Energy Storage Power Station isn't quite that massive, its 2.1 GWh capacity makes it the LeBron James of grid-scale batteries - setting new records and changing how we play. While this effort will require changes in the use of energy across all economic sectors, success in these efforts is predicated on our ability to encourage the development of a large supply of zero-emitting renewable electricity. But here's the kicker - we're kinda losing 35% of that clean power due to inadequate storage.
