

Responsibility division for damage to rooftop photovoltaic panels

Overview

This article explains common causes, how to assess damage, immediate steps, working with installers and insurers, repair options, legal remedies, and how to prevent issues on future solar projects. Permitting and inspection are required before a solar array is allowed to produce electricity on the grid. Generally, local governments require solar installers to obtain a permit for rooftop panels before they can be installed. The solar industry has. Coverage varies dramatically by installation type: Roof-mounted panels are typically covered under dwelling coverage with higher limits, while ground-mounted systems fall under “other structures” coverage limited to just 10% of your dwelling coverage—potentially leaving expensive systems. nt to several aspects of photovoltaic (PV) plant operations. These installations will typically last around 30 to 35 years, so it's important to ensure installing panels doesn't cause harm to your roof.
