

# **Rooftop solar photovoltaic power generation is free**

## Overview

---

The short answer is no, you can't get free solar panels from the government. That being said, there are many incentives put in place by the Federal Government to help homeowners transition to solar energy to power their homes. In August of 2022, the United States Solar rooftop potential for the entire country is the number of rooftops that would be suitable for solar power, depending on size, shading, direction, and location. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+. Many areas offer attractive Renewable Energy Credits (RECs) that, when coupled with federal and local incentives, can make rooftop solar an attractive financial choice that is also good for the environment. Use this buying guidance to learn more about your options, how to ask the right questions of. A rooftop solar power system, or rooftop PV system, is a photovoltaic (PV) system that has its electricity-generating solar panels mounted on the rooftop of a residential or commercial building or structure. Why is solar PV important?

Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time.

## Rooftop solar photovoltaic power generation is free

---

### Rooftop solar power

For consumers, a solar PV system can help them reduce their reliance on fossil fuels by using the sun's free energy to produce electricity that they can use in their home.
