

Rooftop solar power generation equipment for home use

Overview

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where you live, you may also consider a solar battery. But different product options and brands can. So to accommodate these obstacles, a type of solar photovoltaic (solar PV) system had been developed which is known as rooftop solar PV systems. This is a type of solar PV system that involves the generation of electricity using solar panels mounted on the rooftops of residential, commercial or. Solar projects are making it easier for Americans to choose solar energy to power their homes.
