

San marino electricity consumption

Overview

Official and up-to-date data of San Marino for all years of statistics, in an easy-to-read format. Analysis of access to electricity with advanced tools for comparisons, trends, shares, and various metrics. What is San Marino's average energy consumption per person?

When comparing the total energy consumption of countries, the differences often reflect variations in population size. It's useful to look at differences in energy consumption per capita. San Marino, the third-smallest country in Europe, is entirely dependent on imported fuels to meet its energy needs. It reflects the extent of industrialization and electrification of life, strongly correlating with GDP, urbanization rates, and electrification rates. This stayed constant from the previous number of 100. Since 1990, for the whole period of World Bank data, this indicator has not changed.
